

AFRICA BIKE BY KONA

It's the flagship of our [AfricaBike Program](#), meaning it's designed to survive the rigors of a rural beating.

With the experience of delivering over 4,000 AfricaBikes to sub-Saharan African communities in need of transportation assistance, we know what an affordable, durable, and functional commuter bike needs to be: simple, easy to use, and tough as nails.

The AfricaBike Three comes with an internal three-speed rear hub with coaster brake—keeping things sealed and protected—a sturdy, integrated rear rack, basket up front, kickstand, fenders and a step-through aluminum frame that makes it safe, comfortable and fun.
